PROFESSIONAL PROFILE

Full stack software engineer with 4+ years of experience building web, mobile and cloud applications, and founder of The Trader's Hindsight, a live subscription SaaS with 100,000+ lines of TypeScript, 97 API routes and 279 automated test files. Works across React, Next.js, React Native and Flutter on the front end and Node.js, Python, Java (Spring Boot) and C# (.NET) on the back end, with PostgreSQL, MySQL and MongoDB. Has shipped payment integrations (Flutterwave, NOWPayments), broker integrations (cTrader, MetaTrader) and AI features on the Anthropic API, with security designed RLS-first. Holds an M.Sc. in Cyber Security and brings earlier hands-on security experience to every product.

TECHNICAL SKILLS

- **Programming Languages:** TypeScript | JavaScript | Python | Java | C# | SQL
 - **Frontend:** React | Next.js | Tailwind CSS | Material UI | Bootstrap | HTML5 | CSS3 | react-three-fiber (3D) | Responsive Web Design
 - **Mobile:** React Native | Flutter
 - **Backend:** Node.js | Express.js | Spring Boot | .NET | Django | REST APIs | Webhooks | WebSockets
 - **Databases:** PostgreSQL | Supabase | MySQL | MongoDB | Redis
 - **Cloud & DevOps:** AWS | Vercel | Firebase | Docker | GitHub Actions (CI) | Sentry
 - **Integrations:** Flutterwave | NOWPayments | Anthropic (Claude) API | Telegram Bot API | cTrader Open API | MetaTrader
 - **Security:** PostgreSQL Row-Level Security | Multi-Factor Authentication | JWT & OAuth | Vulnerability Assessment | Secret Scanning & Dependency Auditing
 - **Tools & Practices:** Git | GitHub | Automated Testing | Agile | OOP | SOLID Principles | Debugging | Linux | AI-Assisted Development (Claude Code)
-

WORK HISTORY

FOUNDER & SOFTWARE ENGINEER

Hindsight Trade Analytics Limited • Dec 2025 – Present

- Designed, built and launched The Trader's Hindsight (tradershindsight.com), a subscription SaaS for forex and prop-firm traders: Next.js 16, React 19, TypeScript and Supabase (PostgreSQL), with 100,000+ lines of application code, 38 pages, 97 API routes and 150+ SQL migrations, merged into one schema baseline.
- Built trade ingestion: read-only automatic sync from cTrader (Open API) and MetaTrader on scheduled background jobs, plus CSV/Excel import from cTrader, MetaTrader, TradeLocker, DXtrade and MatchTrader, with trades auto-tagged by session, instrument and behavioural pattern.
- Integrated subscription billing with Flutterwave (cards) and NOWPayments (crypto) via webhook handlers, and designed security RLS-first: PostgreSQL Row-Level Security, multi-factor sign-in enforced at the database level with recovery codes, and encrypted (sealed) broker tokens.
- Built Foresight, a read-only co-pilot that reads each trade as it opens, sends the trader a Telegram risk check (trend across timeframes, reward-to-risk, money at risk against their limit, correlated positions, upcoming news), reports how each warning played out, and grades its own warnings A to F against real results.
- Built the Hindsight engine, which replays a trader's month without each costly habit and ranks the habits by the dollars they cost, and Insight, an AI coach on the Anthropic (Claude) API that analyses the trader's full history.
- Built per-firm prop rule tracking (FTMO, FundingPips, FundedNext, The5ers, Alpha Capital) that auto-disconnects breached accounts, and Firm Fit, which simulates a trader's real trades against each firm's rules to estimate pass probability, parsing statements in the browser.
- Backed the codebase with 279 automated test files (about 50,500 lines), a GitHub Actions CI pipeline with dependency auditing and secret scanning, and Sentry error monitoring.
- Runs HTA Studio, the company's web arm, delivering live websites for small businesses, including isilens.co.uk and goldencrestservices.com.

SOFTWARE ENGINEER (CONTRACT)

QuantumEdge Technologies PLC • Nov 2025 – Jan 2026

- Led development of scalable cloud-based applications used by 250,000+ active users globally.

- Built and maintained RESTful APIs supporting multiple enterprise applications and third-party integrations.
- Initiated and led the migration of legacy systems to cloud-based platforms, reducing operational costs by 20% and improving availability and reliability.
- Reduced the average time from feature request to deployment by 40%, contributing to a 10% increase in product releases.
- Authored technical documentation that improved team efficiency through knowledge sharing, and collaborated with product managers, UI/UX designers and engineers to deliver on schedule.

FULL STACK DEVELOPER

MTrendz, London (Remote) · Sep 2021 – Jun 2025

- Led development of a scalable e-commerce platform in an Agile team, delivering all milestones on time.
- Designed and implemented RESTful APIs and payment integrations, reducing transaction time by 50%.
- Built responsive React interfaces that improved user satisfaction by 35%, and delivered features that raised customer engagement by 40%.
- Introduced CI/CD pipelines, increasing deployment efficiency by 20%.
- Created 18 image-to-text applications, downloaded 10,000+ times.
- Supported maintenance of 17 engineering applications within the first 30 days, and filed 1,200 upgrade and bug-fix reports during operating-system-level testing.
- Assisted in migrating legacy systems to a microservices architecture, and maintained code quality through testing, code reviews and security best practices.

CYBER SECURITY SPECIALIST

Meteotech, Abuja · Mar 2019 – Jun 2020

- Monitored and secured enterprise systems against cyber threats, and implemented authentication and authorization protocols (JWT, OAuth).
- Conducted vulnerability assessments and security audits, reducing the systems' exposure to risk.
- Integrated secure coding practices with development teams, and managed logging, monitoring and incident response to detect and contain threats in real time.

KEY PROJECTS

- **ChicBags & UrbanShoes (E-commerce)** · github.com/prosperjohn9/ecommerce2025 – Full-stack store with a Spring Boot (Java) and PostgreSQL back end and a React + Material UI front end: product catalogue, cart, checkout, order confirmation and dark mode.
- **Isi Lens Photography Portfolio** · isilens.co.uk – Next.js and Tailwind portfolio with a 3D museum-walkthrough gallery built in react-three-fiber, plus the brand identity and logo.
- **GoldenCrest (AI Film & Imagery Studio)** · goldencrestservices.com – Live business website covering the studio's work, services, two talk shows and a books-and-classes shop (Golden Press), with a self-serve admin panel; built on Next.js 16 (App Router), TypeScript, zod and Supabase.

EDUCATION

- **Master of Science (M.Sc.), Cyber Security (Feb 2026)**
Üsküdar University, Istanbul · Thesis: Artificial Intelligence in Cybersecurity: Adaptive Threat Detection, Prevention Mechanisms and Emerging Challenges
- **Bachelor of Engineering (B.E.), Computer Engineering (Jul 2024)**
Üsküdar University, Istanbul · GPA 3.63
- **Bachelor of Education (B.Ed.), Chemistry Education (Jul 2017)**
Delta State University, Abraka
